Project Name	Library Book Request System using ServiceNow
Maximum Marks	4 Marks

7. RESULTS

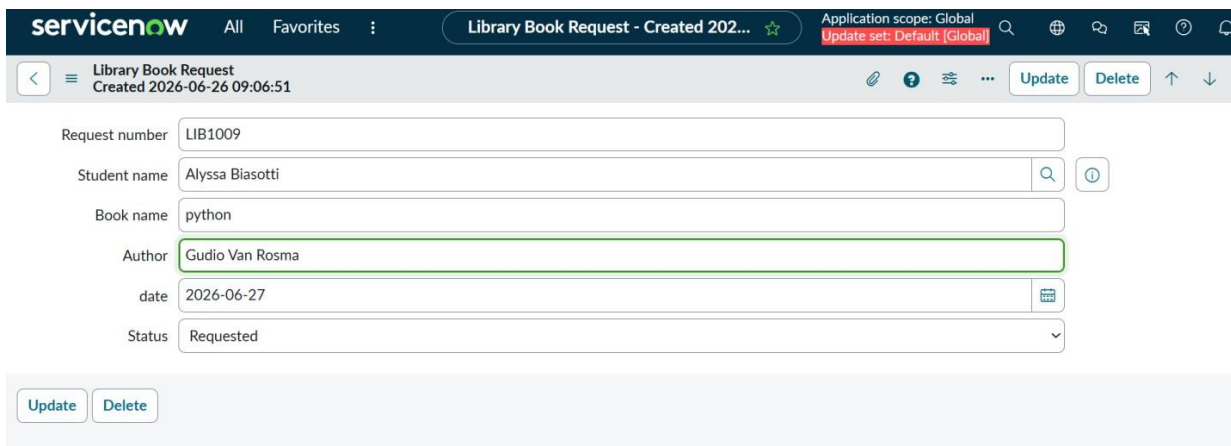

The **Library Book Request System** was successfully developed and implemented using the ServiceNow platform. The application automates the library book request process by allowing students to submit book requests through an online form. The system validates the issue date to ensure that it is not in the past, automatically generates a unique request number for every request, stores all request details in the custom table, and sends an email notification to the librarian upon successful submission.

The application was tested with multiple book requests, and all functionalities worked as expected. The generated request numbers were unique, the validation prevented invalid issue dates, and notifications were delivered successfully to the librarian. The system provides a simple, reliable, and efficient solution for managing library book requests.

7.1 Output Screenshots

Screenshot 1: Library Book Request Form

Description: Displays the form where students enter their details, book name, author, issue date, and submit the request.

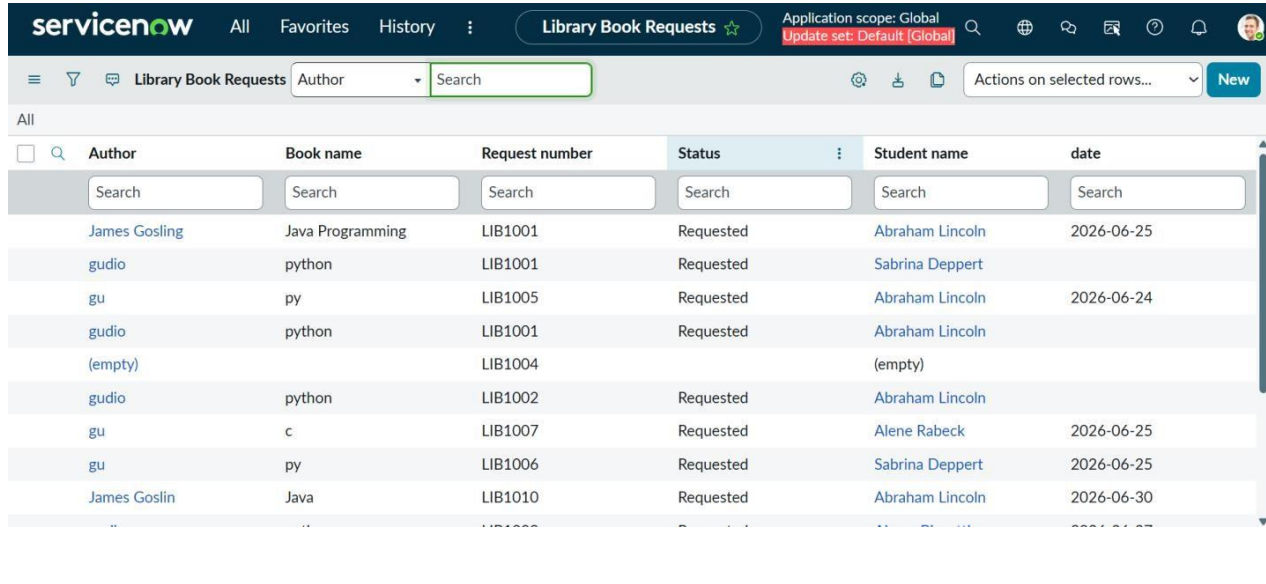

The screenshot shows the ServiceNow interface for the 'Library Book Request' form. The header includes the ServiceNow logo, navigation tabs (All, Favorites), and a breadcrumb trail 'Library Book Request - Created 202...'. The form fields are as follows:

- Request number: LIB1009
- Student name: Alyssa Biasotti
- Book name: python
- Author: Gudio Van Rosma
- date: 2026-06-27
- Status: Requested

At the bottom of the form, there are 'Update' and 'Delete' buttons. The interface also shows a top bar with 'Application scope: Global' and 'Update set: Default (Global)'.

Screenshot 2: Submitted Request Record

Description: Shows the successfully submitted library book request with the automatically generated request number.

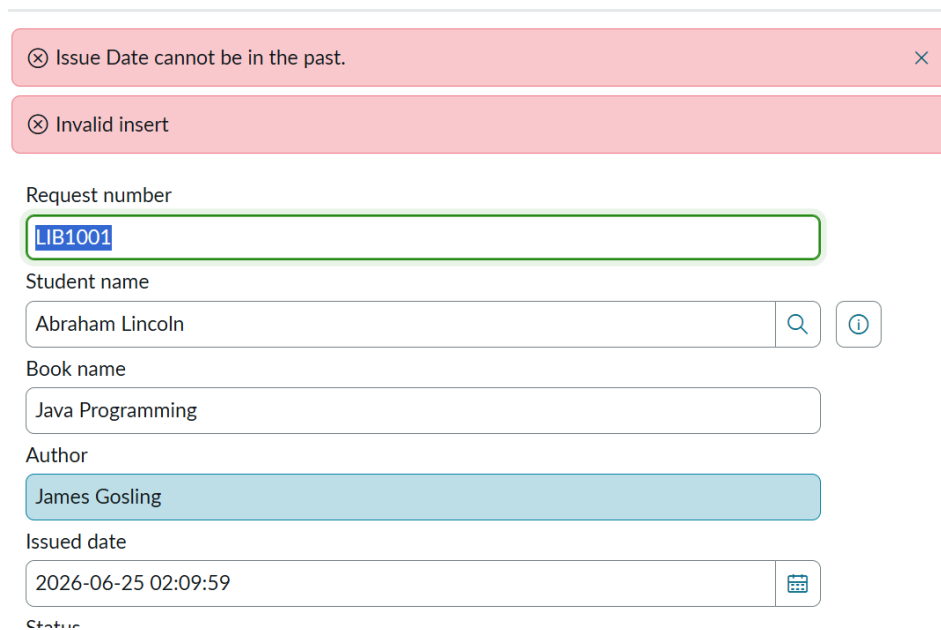

The screenshot shows the ServiceNow interface for the 'Library Book Requests' table. The table has columns for Author, Book name, Request number, Status, Student name, and date. The 'Request number' column is highlighted in blue. The table contains several rows of data, including requests for 'Java Programming', 'python', and 'Java'.

Author	Book name	Request number	Status	Student name	date
James Gosling	Java Programming	LIB1001	Requested	Abraham Lincoln	2026-06-25
gudio	python	LIB1001	Requested	Sabrina Deppert	
gu	py	LIB1005	Requested	Abraham Lincoln	2026-06-24
gudio	python	LIB1001	Requested	Abraham Lincoln	
(empty)		LIB1004		(empty)	
gudio	python	LIB1002	Requested	Abraham Lincoln	
gu	c	LIB1007	Requested	Alene Rabeck	2026-06-25
gu	py	LIB1006	Requested	Sabrina Deppert	2026-06-25
James Goslin	Java	LIB1010	Requested	Abraham Lincoln	2026-06-30

Screenshot 3: Issue Date Validation

Description: Displays the error message when a user selects an issue date that is in the past.

The screenshot shows a ServiceNow form with several fields. The 'Request number' field contains 'LIB1001'. The 'Student name' field contains 'Abraham Lincoln'. The 'Book name' field contains 'Java Programming'. The 'Author' field contains 'James Gosling'. The 'Issued date' field contains '2026-06-25 02:09:59'. There are two error messages displayed at the top: 'Issue Date cannot be in the past.' and 'Invalid insert'.

Request number

LIB1001

Student name

Abraham Lincoln

Book name

Java Programming

Author

James Gosling

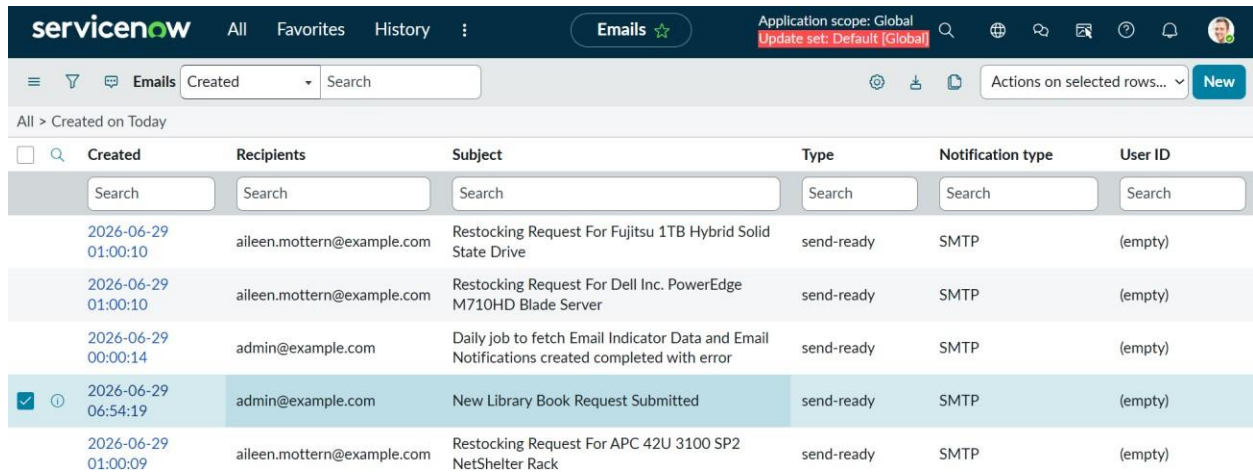

Issued date

2026-06-25 02:09:59

Status

Screenshot 4: Email Notification

Description: Shows the email notification sent to the librarian after a new book request is submitted.

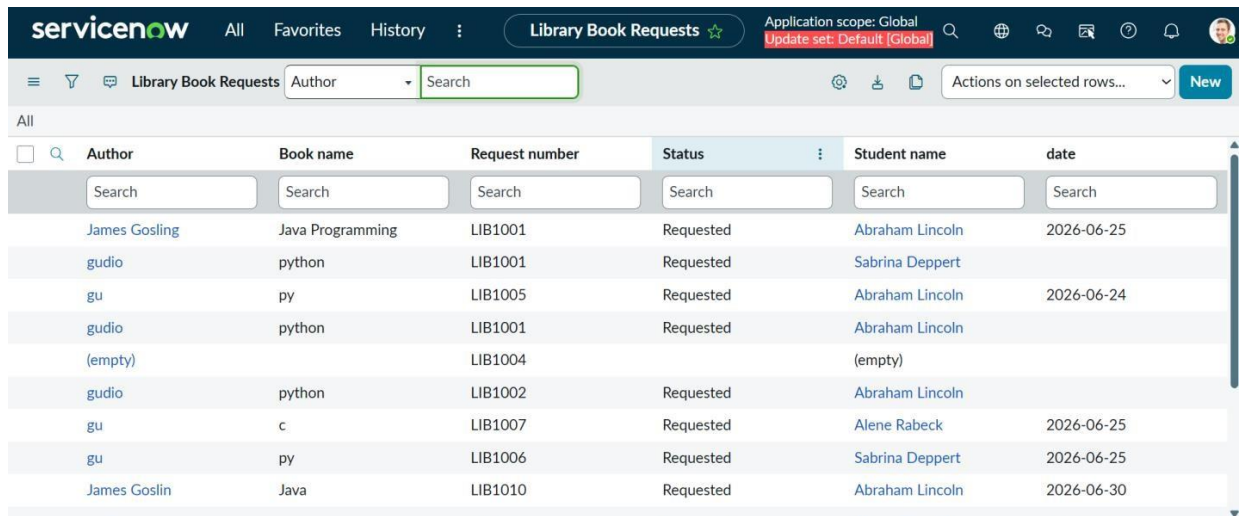

The screenshot shows the ServiceNow interface for the 'Emails' list. The header includes the ServiceNow logo, navigation tabs (All, Favorites, History), and a search bar. The main content area displays a table of email notifications. The table has columns for Created, Recipients, Subject, Type, Notification type, and User ID. The 'Created' column is highlighted with a blue background. The table contains five rows of data, with the third row (dated 2026-06-29 06:54:19) selected, indicating a 'New Library Book Request Submitted'.

Created	Recipients	Subject	Type	Notification type	User ID
2026-06-29 01:00:10	aileen.mottern@example.com	Restocking Request For Fujitsu 1TB Hybrid Solid State Drive	send-ready	SMTP	(empty)
2026-06-29 01:00:10	aileen.mottern@example.com	Restocking Request For Dell Inc. PowerEdge M710HD Blade Server	send-ready	SMTP	(empty)
2026-06-29 00:00:14	admin@example.com	Daily job to fetch Email Indicator Data and Email Notifications created completed with error	send-ready	SMTP	(empty)
2026-06-29 06:54:19	admin@example.com	New Library Book Request Submitted	send-ready	SMTP	(empty)
2026-06-29 01:00:09	aileen.mottern@example.com	Restocking Request For APC 42U 3100 SP2 NetShelter Rack	send-ready	SMTP	(empty)

Screenshot 5: Library Book Request List

Description: Displays all submitted book requests stored in the custom ServiceNow table.

The screenshot shows the ServiceNow interface for the 'Library Book Requests' list. The header includes the ServiceNow logo, navigation tabs (All, Favorites, History), and a search bar. The main content area displays a table of library book requests. The table has columns for Author, Book name, Request number, Status, Student name, and date. The 'Status' column is highlighted with a blue background. The table contains ten rows of data, showing various book requests with their respective authors, titles, request numbers, and dates.

Author	Book name	Request number	Status	Student name	date
James Gosling	Java Programming	LIB1001	Requested	Abraham Lincoln	2026-06-25
gudio	python	LIB1001	Requested	Sabrina Deppert	
gu	py	LIB1005	Requested	Abraham Lincoln	2026-06-24
gudio	python	LIB1001	Requested	Abraham Lincoln	
(empty)		LIB1004		(empty)	
gudio	python	LIB1002	Requested	Abraham Lincoln	
gu	c	LIB1007	Requested	Alene Rabeck	2026-06-25
gu	py	LIB1006	Requested	Sabrina Deppert	2026-06-25
James Goslin	Java	LIB1010	Requested	Abraham Lincoln	2026-06-30
