

Project Design Phase-II

Data Flow Diagram & User Stories

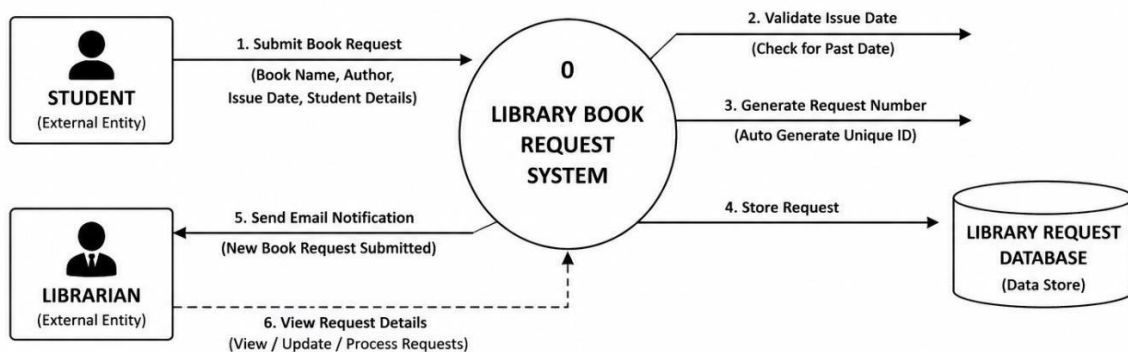

Date	03 July 2026
Team ID	
Project Name	Library Book Request System using ServiceNow
Maximum Marks	4 Marks

Data Flow Diagram (DFD)

The Data Flow Diagram (DFD) shows how information moves through the Library Book Request System. First, the student enters the required details such as student name, book name, author, and issue date. The system validates that the issue date is not in the past and automatically generates a unique request number. After successful validation, the request is stored in the Library Book Request table. Finally, an email notification is sent to the librarian informing them about the new book request. The librarian can then view and process the submitted requests through the ServiceNow application.

DATA FLOW DIAGRAM (DFD) – LEVEL 0

Library Book Request System

User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Student	Book Request	USN-1	As a student, I can submit a library book request by entering my details, book name, author, and issue date.	The request is successfully submitted.	High	Sprint-1
Student	Request Validation	USN-2	As a student, I should not be able to select an issue date in the past.	System displays an error if the issue date is in the past.	High	Sprint-1
Student	Request Number	USN-3	As a student, I want a unique request number generated automatically for every request.	A unique request number (LIB1001, LIB1002...) is generated.	High	Sprint-1
Librarian	Email Notification	USN-4	As a librarian, I want to receive an email whenever a student submits a book request.	Email notification is received immediately after submission.	High	Sprint-1
Librarian	View Requests	USN-5	As a librarian, I can view all submitted book requests.	All requests are available in the ServiceNow table.	Medium	Sprint-1
Administrator	Manage Records	USN-6	As an administrator, I can manage and update library request records.	Records can be viewed, updated, or deleted if necessary.	Medium	Sprint-2
